MHSA 3 Year Plan Community Survey (for FY 14-15, 15-16, 16-17)

8. Over the years BHRS has sought stakeholder input for ways to continuously strengthen MHSA funded programs based on issues and unmet needs identified during initial planning processes for CSS and PEI. These three categories summarize the overarching areas of focus:

- Community capacity building/outreach to increase protective factors in diverse communities
- Peer & family support for all ages
- Access & Service to high use, at risk individuals

Should additional MHSA funds become available within the next three (3) years, we would like input on where to focus program expansions or, possibly, establishment of new programs. Please list the following issues by priority, from **1 = First Priority to 4 = Last Priority**, according to how strongly you feel each issue should be considered in the future.

Outreach to diverse underserved communities	_____
Expand full service partnership programs	_____
Community-based peer support	_____
Expand and enhance the continuum of outpatient care for all ages	_____

Other issues you feel should be considered in the future:

9. Innovation projects have focused on four learning edges that were developed from stakeholder input. Please prioritize the following learning edges according to how strongly you feel they should be considered for future innovation projects with **1 = First Priority to 4 = Last Priority**.

Connecting people receiving services to community-based supports	_____
Honoring and identifying more holistic approaches to well-being and increasing protective factors	_____
Improving the well being of children, Transition Age Youth (TAY) and Transition Age Young Adults (TAYA)	_____
Treatment options for people struggling with both substance abuse and mental illness	_____

Other areas of learning you feel should be considered in the future:
